No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 21, Application US/09291023A Patent No. 6309871
GENERRAL INFORMATION:
APPLICANT: Outtrup, Helle
APPLICANT: Borchert, Torben
APPLICANT: Nielsen, Bjarne
APPLICANT: Nielsen, Bjarne
APPLICANT: Nielsen, Vibeke

```
APPLICANT: No. 6287826man, Barrie Edmund
APPLICANT: Hendriksen, Hanne Vang
TITLE OF INVENTION: Enzymatic Preparation of
TITLE OF INVENTION: From Starch
TITLE OF INVENTION: From Starch
TITLE OF INVENTION: From Starch
TITLE OF INVENTION: From Starch
TITLE OF INVENTION: WIMBER: US/09/264,097
CURRENT APPLICATION NUMBER: US/09/264,097
CURRENT FILING DATE: 1999-03-08
EARLIER APPLICATION NUMBER: 60/079,209
EARLIER APPLICATION NUMBER: 60/079,209
EARLIER APPLICATION NUMBER: 09/079,209
EARLIER FILING DATE: 1998-03-24
NUMBER OF SEQ ID NOS: 8
SOFTWARE: FastSEQ for Windows Version 3.0
SEQ ID NO 2
LENGTH: 483
TYPE: PRT
ORGANISM: Bacillus licheniformis

Patent No. 6361989

GENERAL INFORMATION:

APPLICANT: Svendsen, Allan

APPLICANT: Bisgard-Frantzen Henrik

APPLICANT: Outcrup, Helle

APPLICANT: Nielsen, Bjarne Ronfeldt

APPLICANT: Nielsen, Vibeke Skovgaard

APPLICANT: Nielsen, Vibeke Skovgaard

APPLICANT: Hoeck, Lisbeth Hedegdard

TITLE OF INVENTION: No. 6361989el -Amylase And -Amylase Mut

FILE REFERENCE: 5276.400-US

CURRENT APPLICATION NUMBER: US/09/290,734

CURRENT FILING DATE: 1999-04-13
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    S.

                                                                                                                                                                                                                       120
                                                                                                                                                                                                                                                                                           60
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 8, Application US/09918543

Patent No. US20020155574A1

GENERAL INFORMATION:

APPLICANT: No. US20020155574A10zymes A/S

APPLICANT: Thisted, Thomas

APPLICANT: Kjaerulff, Soren

APPLICANT: Kjaerulff, Soren

APPLICANT: Fuglsang, Claus Crone

TITLE OF INVENTION: Alpha-amylase mutants with altered pro;

FILE REFERENCE: 10062.200-US

CURRENT APPLICATION NUMBER: US/09/918,543

CURRENT FILING DATE: 2001-07-31

NUMBER OF SEQ ID NOS: 30

SOFTWARE: PatentIn version 3.1

SEQ ID NO 8

LENGTH: 483

TYPE: PRT

CRGANISM: Bacillus licheniformis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   밁
